^{2 0)&}quot;De facto" population. Annual data are for June. (2) At current market prices. Annual data are totals of the four quarters, (3) Output of building and civil engineering work, excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4) New series not strictly comparable with previous figures. Value for first quarter of 1955 on the former basis was £276 million.

Note.—Until the end of 1954, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1954 have been revised accordingly. Monthly figures for 1955 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

O'Exclusive of stillbirths.

O'Exclusive of stillbirths.

O'Not applicable to figures on population and immigration.

**O'Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

O'Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

⁽i) Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a measured adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

(i) This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

OAs of April, 1949, Newfoundland data are included.

OAnnual computation to 1953 estails considerable adjustments in production and external trade as described on page 19 of the Coal Report for 1953.

(i) As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

(ii) Includes gas used for house heating.

(iii) Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

Note: In view of the change, in March 1955, in the method of reporting certain categories of refining operations, the classification of the table was altered so that continuity of the series could be maintained as much as possible.

(1) Prior to March, 1955 excludes a certain amount of imported fuels.

Note: Iron ore shipments and silver and gold production include Newfoundland as of April and as of May, 1949 respectively.

(a) Includes copper fine in ore, ingots, bars, billets, rods, strips, sheets and tubing.

(b) Includes ingots, bars and billets.

(c) Includes nickel in matte or speiss, oxide and fine.

(c) Includes Newfoundland as of May, 1949.

(d) Includes nickel in matte or speiss, oxide and fine.

(d) Includes Newfoundland as of May, 1949.

(e) Includes Newfoundland as of May, 1949.

(i) Includes Newfoundland as of May, 1949.

(ii) Includes Newfoundland as of May, 1949 respectively.

(ii) Includes Newfoundland as of May, 1949.

(iii) Includes Newfoundland as of May, 1949.

(iii) Includes Newfoundland as of May, 1949.

OAs at end of period. O'Total inventories held including manufacturers' own inventories and that portion not owned by reporting firms but financed by progress payments. O'Inventories include manufacturers' own inventment only. O'Includes primary iron and steel, iron castings, sheet metal products and wire and wire products. O'Includes heavy electrical machinery, office, household and store machinery and industrial machinery.

O'Excludes heavy electrical machinery.

O'Excludes heavy electrical manufacturing industries, D.B.S.

^{*}Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the grass value of shipments universe for the industry from the Annual Census of Industry Survey.

⁽i)Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1983. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1983.

(i) Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

O'Releases of domestically manufactured tobacco for consumption in Canada.

O'End of period.

O'The production of beer is shown in thousand barrels of 25 gallous each.

Commencing with April, 1949, Newfoundland is included.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

(a) Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

(b) Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

(c) Total pulp production covers "acreenings" are excluded throughout from mechanical and chemical pulp.

(d) Mill shipments destined for export.

(e) Mill shipments destined for export.

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete seammeration Source: New Residential Construction, D.B.S.

O'The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

(3) As of January, 1950, Newfoundland is included.

O'Planks and boards, flooring and square timber.

O'Includes Newfoundland as of May, 1949.

O'Hollow blocks including fireproofing and load-bearing tile.

O'For building insulation only.

O'Figures cover the groduction of firms which normally account for 85 per cent of the total for Canada.

O'Bractory sales of firms which normally account for 85% of total Canadian production.

O'Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensess and advice from American grain correspondents.

O'Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

(O'Annual data are monthly averages of crop year.

(O'Includes eggs for hatching.

Beginning with April, 1980, Newfoundland is included.

Oil in the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.

O'Operating income equals operating revenues less operating expenses adjusted for tax accruals and ratio equipment and joint facilities.

1,014 1,032 1,044 2,862 2,838 2,775 OPrior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the revious month.

OPrior July, 1954, the figures are not adjusted for items in transit.

OPrior to July 1st, 1954, the statutory minimum requirement was 5 for each day; since that date it has been a monthly average of 8 per cent.

OBacluding Canadian day-to-day loans.

OPrigures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 25 companies operating in Canada representing 90 per cent of new ordinary insurance sales. "Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in September, 1955 was 18% above that of September, 1954.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to set profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (unduling government-owned companies and incorporated co-operatives).

(i) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(ii) Includes, in addition to the industries listed, Tobacco, (ii) Includes Printing and Publishing and Allied Industries.

Assignments made under the Bankruptcy and Winding-Up Acts. ()Quarterly data for the last five columns are monthly averages. (*)In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
